Copy trading is a trading functionality that allows the trader to copy the account of other traders, it is a method that allows traders to copy specific strategies, copy trading links a portion of the copying trader's funds to the account of the copied investor (Master Trader). Any trading action made thenceforth by the copied Master Trader, such as opening a position, assigning Stop Loss and Take Profit orders, or closing a position, is also executed in the copying trader's account according to the proportion between the copied Master Trader's account and the copying trader's allotted copy trading funds.

The copying trader usually retains the ability to disconnect copied trades and manage them themselves. They can also close the copy relationship altogether, which closes all copied positions at the current market price.
